

***If you can't track your product in a recall,
are you risking the business?***

***MCI Myrias Batch Tracking software helps you pinpoint the
problem and avoid needlessly scrapping safe product***

MCI Myrias Batch Tracking software tracks the codes that you use to mark your Product, making sure that you can find all the information relating to a particular Batch, Works Order, Shelf Life etc whenever you need it.

MCI Myrias Batch Tracking prompts the Operator to enter the traceability identifiers associated with the product and logs them against the checks or tests that are being carried out. The result is a comprehensive record facilitating full traceability of all the important parameters. Product recalls and quarantines become much less costly in time, trouble and money. Now it's possible to identify, locate and segregate the exact batch of product rather than playing safe with a larger - and more expensive - quantity.

- ◆ Runs on standard **MCI Myrias** systems for Product and Filling Line control
- ◆ Manager-edited names of up to four identifiers e.g. Batch Codes, Blend ID, Works Order Nos, Customer Code etc.
- ◆ Configurable prompt-and-entry sequence for Operator entries.
- ◆ Check frequency can be configured to suit regime
- ◆ Full accountability and traceability data for every check
- ◆ Analysis of collected data by any combination of Manager-configured tracking codes

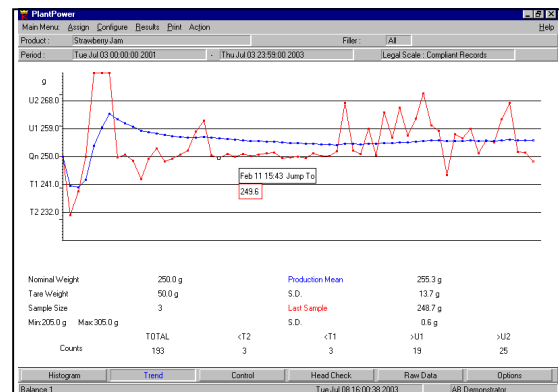

MCI Myrias software has been proved in over 15 years of practical application throughout British Industry. Installations in food, drink, chemicals and engineering plants have helped to reduce production costs, improve quality and provide records for regulatory requirements.

Optional additional **MCI Myrias** software modules include:

- MCI Myrias Date Code** for verifying Best Before and other life-expiry codes
- MCI Myrias Component Code** for checking container and packaging components
- MCI Myrias Quality** for quality attribute checking against AQL

SCREEN DISPLAYS AND PRINTED REPORTS

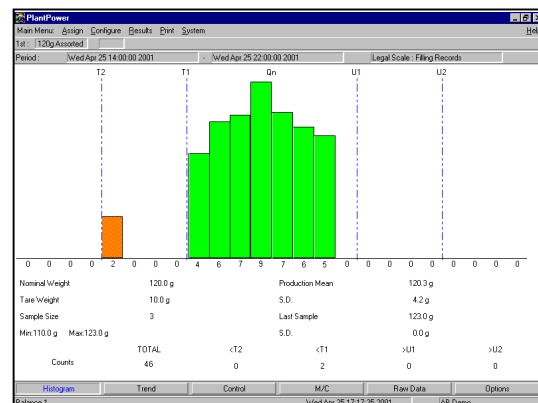

- ◆ Quick and easy access to recorded information
- ◆ Records up to four tracking codes as standard
- ◆ Free choice of tracking field names

Date	Time	Tracking Code	Value
